Aqueous Cups

Introducing Huhtamaki Foodservice Packaging's line of Aqueous cups, the sustainable cup solution that is fully compostable. Huhtamaki Aqueous cups range offers a new practical solution for beverage packaging.

About Aqueous Coating

Introducing Huhtamaki's new line of Aqueous cups.

Made from aqueous coating, our cups are certified home and commercially compostable, offering a greener alternative to traditional plastic-lined cups.

Aqueous coating is a water based solution that is applied to our cups. It protects against moisture and minimises your environmental footprint.

Available in various sizes and colours. Contact us now for further information.

What does Home Compostable mean?

The product can be placed in a home compost bin where it will decompose naturally within a period of time. Every component and material used in the packaging will break down and decompose into the soil.

What does Industrially (or Commercially) Compostable mean?

The product can be composted in a industrial composting facility. An industrial compost facility is a place where the perfect balance of heat, moisture, and oxygen is created to break down organic and plant-based materials.
